Apoorva Srinivasan

13+ yrs | Frontend Architecture • Design Systems • JavaScript
Building scalable customer experiences, design systems and product platforms.

avroopa.apoorva@gmail.com +919818363367

Present — Publicis Sapient

- Built complex **customer journeys across** Mopar & Goodyear.
- Built **reusable configurable component** architecture
- Converted Figma designs into scalable, responsive enterprise applications.
- Established **reusable SCSS** architecture for redesigns.
- Collaborated with backend teams on API-driven UI.
- Collaborated closely with product, UX, and backend teams on REST APIs, CMS integrations, technical design, **hackathons, proof-of-concepts, and mentoring** while driving frontend engineering best practices

2021 — Professional Development

- MA Psychology
- Counselling internships and training
- Freelance projects for UX designs and logos
- End to end website development solutions for clients.
- Solo travelling

Lyxel labs

2017

- VueJs, Tornado
- Unified integrated dashboard

Zimply

- Website development

2015 — Zopper

Started as Python/Django backend developer

- Took ownership of frontend engineering
- Built complete mobile web platform

2013

- Developed vendor & admin dashboards
- Led frontend team of 5 engineers

13 years

30 projects

3 platforms

Frontend

Vue · HTML · SCSS · Node · React · Javascript

Architecure

AEM · Jenkins · SFCC · Git · Wintersmith

Design

XD · Inkscape · Figma

Backend

Python · Tornado · Flask · Django

Projects

Mealecule – Gamified Health & Nutrition Platform

VueJs . Adobe XD

- Owned the end-to-end UX, branding, and Vue.js frontend development of a gamified health-commerce platform featuring nutrient visualizations, and reward-based shopping experiences.
- Collaborated with backend engineers and product stakeholders from ideation through product demonstrations.

PS Pulse

AI-powered Employee Experience Platform

- Designed the product vision, UX, user journeys, wireframes, and interactive prototypes for an AI-powered employee experience platform while contributing to frontend development, Python integrations, and executive product demonstrations.

Mopar

JavaScript • jQuery • Handlebars • SCSS

- Delivered complex customer journeys including Profile, Dealer Locator, Dashboards, and Service experiences by translating Figma designs into scalable, responsive applications.
- Built configurable component architecture, reusable SCSS foundations, rendering utilities, and dynamic UI solutions that improved development speed and maintainability.
- Collaborated with backend teams on APIs and AEM integrations while modernizing legacy code and establishing frontend standards.

GOODYEAR

Vue.js • JavaScript • SCSS • SFCC • Hybris

- Developed high-traffic e-commerce journeys including PLP, PDP, and Find a Tire across Salesforce Commerce Cloud and Hybris while implementing responsive, API-driven customer experiences.
- Established reusable frontend foundations through shared SCSS architecture, configurable components, jQuery plugins, and modernization of legacy Vue.js applications.

LYXEL

Vue.js • Tornado

- Developed analytics dashboards, reporting platforms, campaign management tools, and internal applications using Vue.js,, Tornado,, and Chart.js for enterprise marketing solutions.
- Made quick emailers and ad popups

ZOPPER

- Progressed from Python/Django Backend Developer to Lead Frontend Engineer, building the complete mobile platform and multiple business applications.
- Developed vendor and admin dashboards while leading a frontend team of five engineers and mentoring junior developers.
- Delivered end-to-end frontend and backend solutions in collaboration with product and design teams.
